

OMODOLAPO OLADOKUN

Data Analyst | SQL | Excel | Power BI | Python

+234 808 254 6681 | dolapoimperial@gmail.com | [linkedin.com/in/omodolapoladokun](https://www.linkedin.com/in/omodolapoladokun) | github.com/omodolapoladokun

PROFESSIONAL SUMMARY

Data Analyst skilled in SQL, Excel, Power BI and Python, with hands-on experience analysing customer, retail, operational and development data. Analysed 7,043 telecom customers to identify a 26.5% churn rate and key retention risks, examined digital development across 11 African countries from 2010-2024, and identified retail delivery delays of up to 214 days. I combine data analysis, data visualization, business problem framing and clear communication to explain what is affecting performance and support better decisions.

TECHNICAL & BUSINESS SKILLS

SQL: SQL Server, MySQL, joins, CTEs, subqueries, window functions, aggregations

Excel: PivotTables, PivotCharts, Power Query, lookup functions, dashboard development

Power BI: Power Query, DAX, data modelling, KPI reporting, data visualization

Python: Pandas, NumPy, Matplotlib, Jupyter Notebook, APIs, ETL

Analytics: EDA, data cleaning, data visualization, trend analysis, customer analysis, reporting, KPI monitoring

Business Analysis: business problem framing, process analysis, requirements understanding, stakeholder communication, recommendation development, data-driven decision making

EXPERIENCE

Associate, Operations | Excel Career Plus

Sep 2025 - Present

- Oversaw the registration and onboarding of approximately 60 students across company web platforms, maintaining accurate records and smooth processing.
- Conducted detailed research and search tasks to support student placement, programme selection and day-to-day operational decisions.
- Coordinated and contributed to partnerships with companies and academic institutions, supporting communication, follow-up and execution.
- Supported admission processing for approximately 5 students applying to schools in the United States, United Kingdom and Europe.
- Managed operational tasks across student services, platform registration and partner coordination, helping keep information accurate and processes on schedule.

Data Analytics Intern | AnalystLab Africa

Jul 2026 - Aug 2026 |
Internship

- Analysed 7,043 telecom customers, identifying a 26.5% churn rate and customer groups at higher retention risk based on contract type, tenure, monthly charges, payment method and support-service adoption.
- Built a Power BI analysis of digital development across 11 African countries from 2010-2024, translating World Bank indicators into comparisons of internet adoption, connectivity and infrastructure gaps.
- Used SQL to investigate retail sales, profitability, customer performance and delivery efficiency, identifying product delivery delays of up to 214 days.
- Applied Python to time-series analysis and API-based ETL workflows, including feature engineering, rolling calculations, data transformation and structured output for analysis.
- Translated findings into recommendations around customer retention, operational efficiency, infrastructure priorities and business performance.

SELECTED ANALYTICS PROJECTS

Digital Development in Africa | Power BI

github.com/omodolapoladokun/Digital-Development-In-Africa

- Analysed World Bank development data across 11 African countries from 2010-2024 to compare internet adoption, mobile connectivity, broadband, electricity access and secure internet infrastructure.
- Found that digital progress improved but remained uneven, with mobile connectivity often outpacing actual internet usage and fixed broadband remaining comparatively limited.

Telecom Customer Churn Analysis | Excel

github.com/omodolapoladokun/Telecom-Customer-Churn-Analysis

- Analysed 7,043 telecom customers and identified 1,869 churned customers, an overall churn rate of 26.5%.
- Identified higher-risk patterns among month-to-month customers, newer customers, Electronic Check users, customers with higher monthly charges and those without Technical Support; translated findings into retention recommendations.

North America Retail Sales Analysis | SQL

github.com/omodolapoladokun/North-America-Retail-Sales-Analysis

- Investigated sales performance, customer segments, product profitability and delivery efficiency using SQL and a dimensional retail data model.
- Identified delivery times reaching 214 days for some products and approximately \$36,471 in profit from Chairs, highlighting operational and product-performance improvement areas.

Apple Stock Time-Series Analysis | Python

github.com/omodolapoladokun/Apple-Stock-Time-Series-Analysis

- Used Python and Pandas to analyse historical AAPL market data across returns, moving averages, trading activity and rolling volatility.
- Engineered time-series features that showed how long-term price growth can still include negative-return periods and elevated short-term volatility.

EDUCATION

University of Ibadan, Nigeria - Bachelor of Library and Information Science, Second Class Upper

Relevant coursework: Research Methods, Information Science, Information Technology

CERTIFICATIONS & VIRTUAL EXPERIENCE

- Data Analytics - The Incubator Hub
- Data Analytics - MyDataClique
- Programming with Python - LPI Hub
- Deloitte Australia Data Analytics Job Simulation - Forage (May 2025): Built data visualizations and used Excel classification to support a forensic analytics investigation.
- Tata Group Data Analytics Job Simulation - Forage (Jun 2025): Conducted EDA and developed a structured framework for customer delinquency-risk analysis.
- Tata Data Visualization Job Simulation - Forage (Jul 2025): Designed executive-facing data visualizations and developed stakeholder questions to guide reporting requirements.
